

RE:BOOT

DEVICE-FOCUSED

A second life for devices left behind by software.

A **device-longevity ecosystem** that helps users keep, repurpose, repair and upgrade parts of their existing devices instead of replacing the entire product.

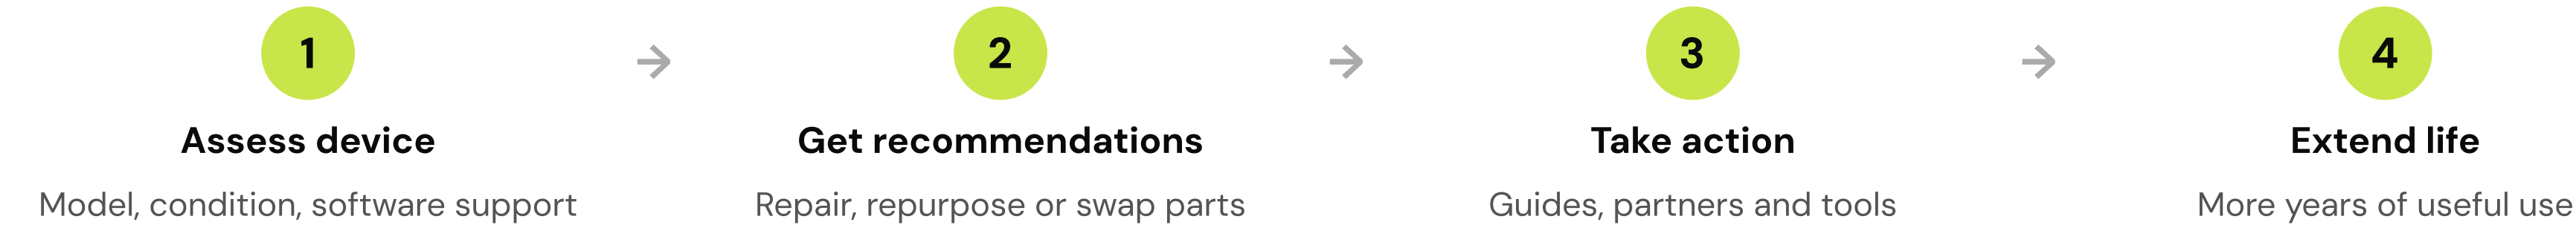

Your device doesn't have to do everything it once did to still be useful.

CORE IDEA

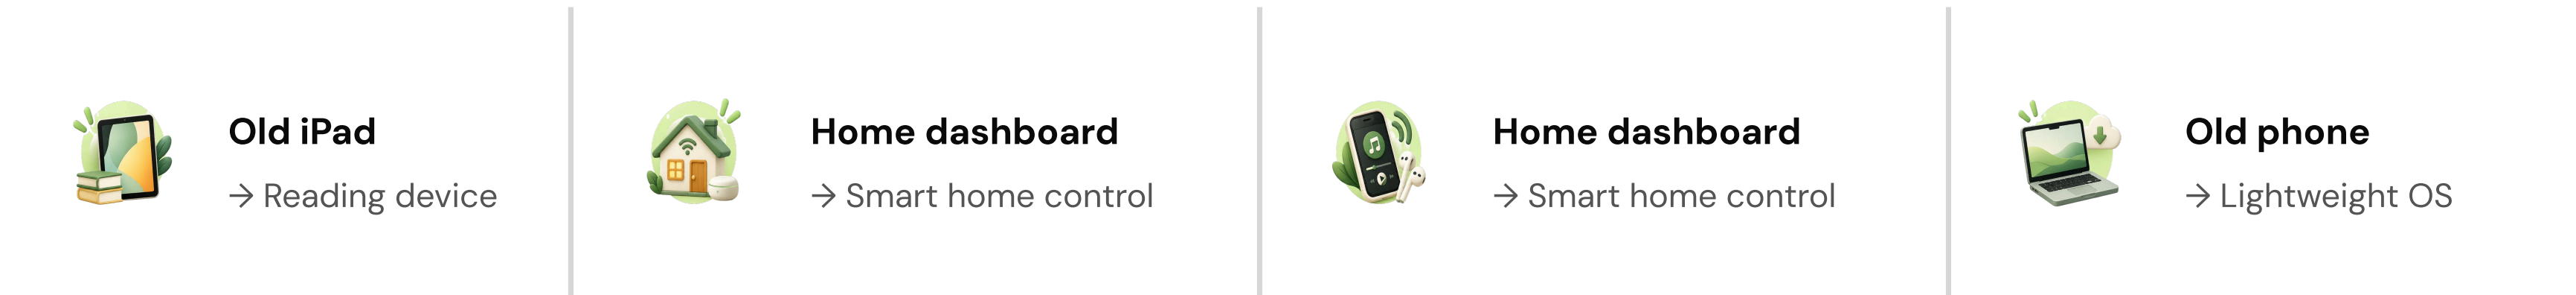

RE:BOOT helps users extend the useful life of their devices through lightweight software, repair, repurposing and a parts exchange ecosystem.

HOW IT WORKS

DEVICE PATHWAYS

KEY FEATURES

- RE:BOOT Lite**
Lightweight software for ageing devices
- RE:BOOT Swap**
Repair and component replacement service
- RE:BOOT Exchange**
Marketplace for parts, repairs and devices

BENEFITS

- ✓ Reduces e-waste
- ✓ Supports repair ecosystem
- ✓ Extends device lifespan
- ✓ Lowers demand for new devices

LIMITATIONS / RISKS

- ✗ Security risks on old software
- ✗ Not all devices are compatible
- ✗ Repair costs may be high
- ✗ Parts availability varies
- ✗ Still consumes electricity
