

FLOW 3: Buying Refurbished Device

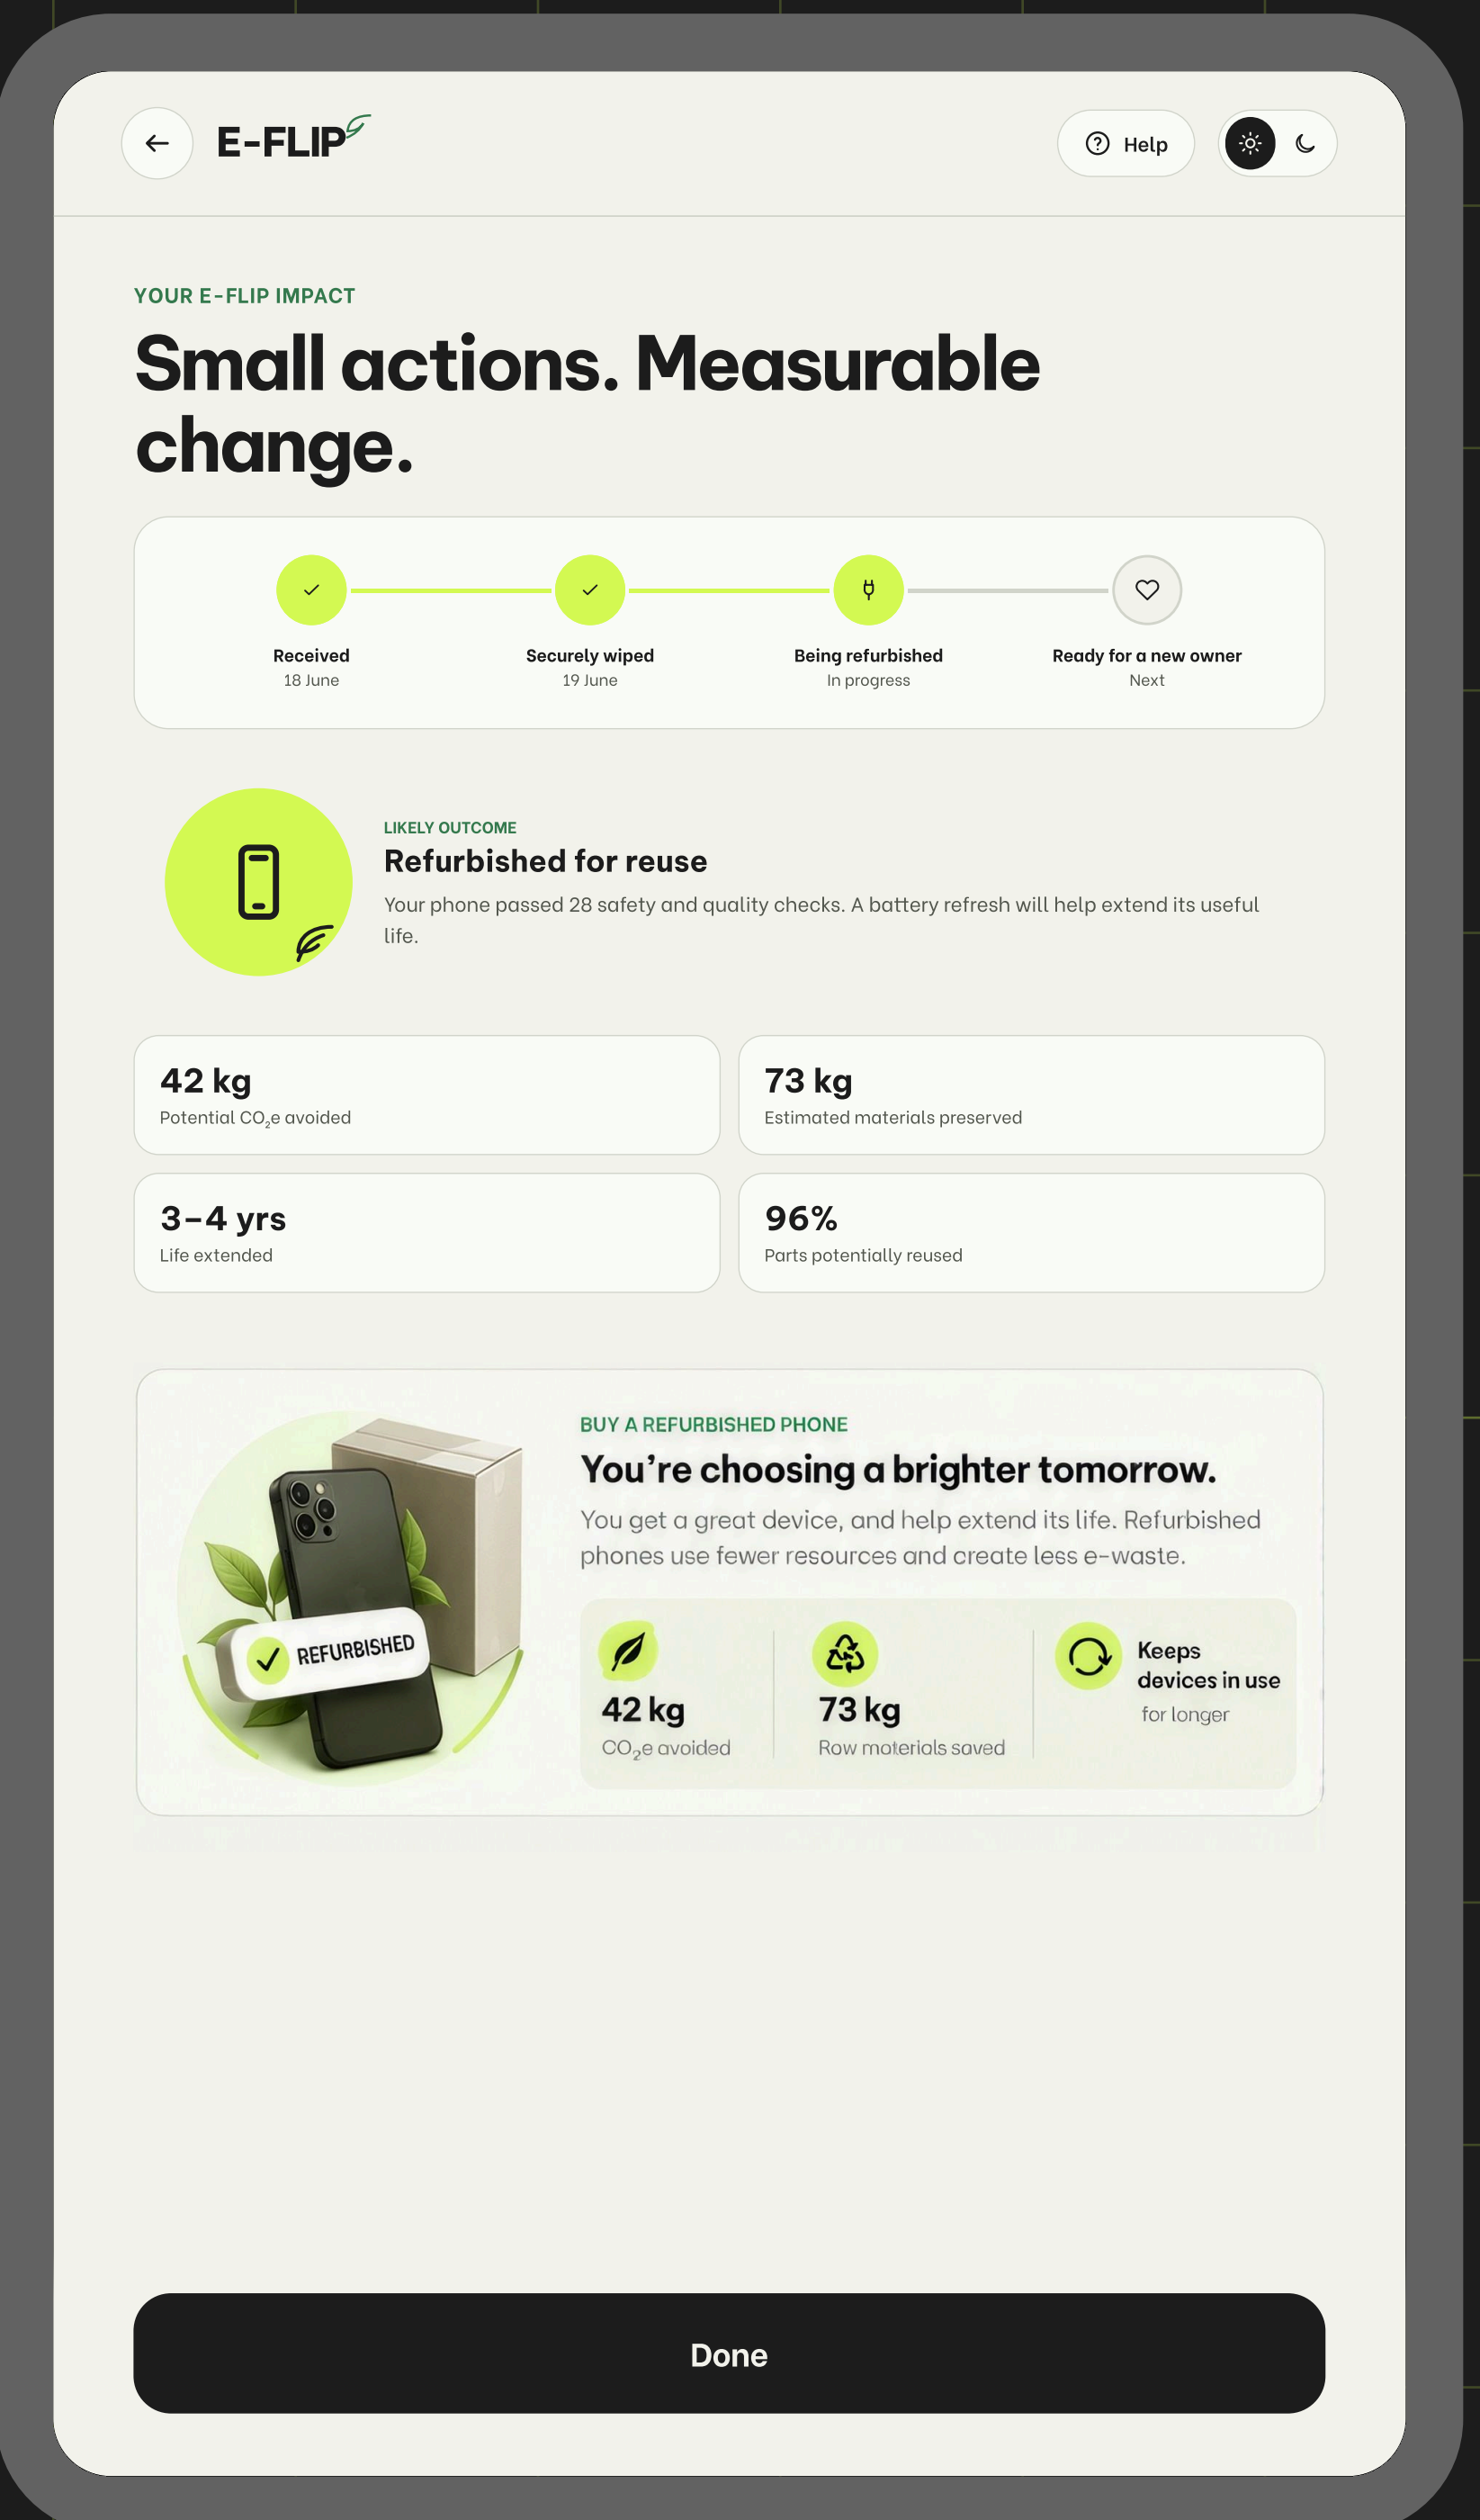

Screen 01 — Accessory add ons optional only if needed

Keeps accessories optional so users buy only what they need, reducing unnecessary consumption while still supporting practical use of the accessories so that they dont go to waste.

Screen 02 — Trade-in option

While buying refurbished products, on giving away old devices or accessories, users would get a discount

Screen 03 — Impact on the environment

Extends that outcome into a measurable impact view, showing reuse, material and carbon indicators so sustainability becomes tangible rather than abstract.

Sustainable packaging

Users will receive the products in eco-friendly paper packaging.
