

Psychological Levers We're Applying

Transparency & Accountability

Showing users what the kiosk accepts, how the device or accessory is assessed, what reward they receive, and what happens next. The Circularity Receipt and outcome tracking make the process visible.

Trust & Integrity

Building confidence through identity and ownership verification, secure handover, clear eligibility, and transparent distinction between cash, refurbished options, repair, reuse and recycling.

Collective Action

Connecting users, retail stores, refurbishers and recycling partners so unused devices and accessories can move into reuse, refurbishment, resale, repair or responsible material recovery.
