

Actor Mapping

A device can retain value beyond its current owner, but this value is often lost because users do not know which actor—repairer, refurbisher, reseller, NGO or recycler—should receive it next.

Multiple Actors: Owners, Repairers, Refurbishers, Resellers, NGOs And E-Waste Collectors All Interact With The Device.

Different Values: A Device That Feels “Old“ To The Owner Can Still Have Value To Another Actor.

Opportunity: Connect The User Directly To The Most Suitable Next-Life Pathway.

Lost Connections: Users Often Don’t Know Which Actor Should Receive Their Device Next.
